

REV³ ENERGY

As our schedules become busier day by day, energy drinks are growing in popularity among a large percentage of the population. Unfortunately, a majority of the mass-market energy drinks available today do not support cellular health, and a number of them have even been banned in some places. **Rev3 Energy** is different. Formulated by USANA scientists as a healthy alternative, **Rev3 Energy** gives you the energy you need along with real nutritional value from beneficial vitamins, antioxidants, and cellular energy components.*

CLEANER

Most mass-market energy drinks are made with high-glycemic sugars that give a quick boost of energy followed by a crash about an hour later. This encourages over-consumption, because after the crash, another hit of sugar (and calories) is needed for more energy. Made with no artificial flavors, sweeteners, preservatives, or colors, each refreshing **Rev3** is low glycemic to provide longer-lasting energy and a natural boost. And because there is no energy crash, you aren't left with a craving for more sugar.

SMARTER

Rev3 products use caffeine derived from all-natural teas that have been proven to support health. At 80 mg per serving, **Rev3** provides a healthy level of caffeine to improve mental alertness and stamina. Recent research indicates caffeine may also have positive effects on weight maintenance and mental function.*

STRONGER

In addition to caffeine, **Rev3** uses powerful, energy-producing ingredients to improve the body's response to stress and fatigue and support efficient cellular energy production. Important antioxidants and phytonutrients also provide free-radical defense to help maintain optimal cellular health.*
